

Building a better  
working world

# EYCarbon

Navigating the climate transformation

## Our EYCarbon offerings:

### Individual CO<sub>2</sub> reduction goals, approaches and strategies

- ▶ Clear picture of the objectives of corporate decarbonization
- ▶ In-depth knowledge of regulation
- ▶ Structured definition of the what, why and how
- ▶ Focused derivation of the product, process and business model portfolio
- ▶ Orchestrated implementation with ecosystem partners

### Climate-neutral operations, supply chain, value networks

- ▶ Customized concepts for Reuse, Reduce, Replace and Resource
- ▶ Specific offsetting in the short- and medium-term perspective
- ▶ Extensive Scope-3-Optimization
- ▶ Sustainable resilience of the value creation networks
- ▶ Optimized CO<sub>2</sub> (certificates) trading/ ETS compliance
- ▶ Specific consulting on financing and funding

### Stakeholder-oriented communication, argumentation and dialogue

- ▶ Validated empirical arguments
- ▶ Accurate stakeholder mapping
- ▶ User-oriented positioning and communication
- ▶ First-class reporting and report review

The path is fixed and irreversible: **Switzerland** will be **climate-neutral** by 2050. **Markets** and **companies** will **change** fundamentally. Our goal is to exploit this major **transformation** of **decarbonization**. We see **great opportunities** to enable **long-term value** for the Swiss **economy** and our **customers**.
